

# Ever need immediate, increased medical transcription capacity?

- Looking for a reliable, well-equipped organization that will provide you with personal service?
- With no worry about inaccurate, poor quality transcriptions?
- Do you need immediate response and one day turnaround?

The goal of JLS Transcription Solutions is to provide you with timely and accurate transcription services at a reasonable cost.

Located in North Carolina and New Jersey, JLS provides medical transcription services through its partner Ameya Mediscribe Pvt. Ltd. JLS and Ameya have worked together for many years. Our NC/NJ offices provide sales, marketing, and customer service so that personal service, quality, and convenience are assured. JLS maintains contact on a daily basis to be sure we are meeting your needs.

JLS/Ameya adheres to all AAMT standards in addition to being HIPAA compliant.

## Quality

"Wow, great accuracy! We've found no errors." This is typical of the comments we've received from our clients.

JLS/Ameya staff provide accurate, timely transcriptions. Our staff of experienced transcriptionists, editors, and quality analysts is well

trained to provide the quality you expect. Our accuracy levels are above 99%.

Many of our QA and Editing staff are also medical practitioners and paramedics. All personnel have a minimum of a Bachelor of Science and are fluent in American English.

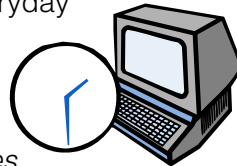

## Training

The JLS / Ameya program consists of approximately 900 hours of training for medical transcriptionists. Candidates must consistently achieve greater than 90% accuracy before they assist with production.

## Quick Turnaround

We can provide transcriptions within 4-24 hours, everyday 365 days a year...and we offer very competitive rates.

We can quickly assist when you have work flow variations with

causes such as:

- New business
- Vacations
- Sickesses
- Sudden staff departures

## Technology To Do The Job Right

We have an extensive computer network managed by four network administrators, with five servers and nodes equipped with amplified Pilot headphones.

Internet connectivity is available through multiple DSL connections and multiple standby ISDN lines. All data is continuously backed up and the network is protected by a UPS system. Further hardware details are available upon request.
